Creative Director: Grace Huang
Designer: Elma Ademovic

Topic: Shohei Ohtani

Initial Build Notes:
- Nav Bar:
    - Look into adding hover effects
- Media Gallery:
    - Play around with header fonts
    - Add more images to make it feel more gallery-like
    - Consider either using just the circle icons at the bottom or just the numbers at the top left of each image
        - When you add more photos, the circle icons may not be the best choice
- Timeline:
    - Think about where to place the images when you add them in the future
    - Nice responsive design
    - How will the images be affected when added?
    - Make the year texts a little bigger

- Overall, looks good and has great progress (matches the mockups well). For next steps, I would consider the notes written above and finish up an initial build for the landing page as well!
